

Sl.No	Name	Year of Publication	Methodology used	Technology used	Conclusion	Future Work	Your Work
1.	E-Government in digital era	2002	Working on existing data	Referred Books	Got to know basic guidelines to implement e-government.	Implement guidelines	Using the guidelines provided in this paper to continue my research.
2.	A Systematic Review of implementation challenges in Public E-Procurement.	2020	Sequentially phased qualitative research.	Google Scholar engine to refer older researches	There is lot of challenges while implementing e-government system.	Working on the challenges	Analysing these challenges and refer to them in further research.
3.	Understanding the incremental nature of e-procurement implementation at state and local levels.	2002	Quantitative Research has been conducted	Taken survey in local area and used it in research.	Reasons why e-procurement process has been slow and what factors are responsible for it.	Taking into consideration of factors and redefining the process.	Analyzing the factors which have slowed down the e-procurement process.
4.	Structuring Public Procurement in Local Government.	2020	Survey Methodology used for qualitative and quantitative results.	Human Research Surveys.	Digitisation has positive procurement efficiency.	To explore other public administrations and how this affects them.	Impact of digitization on local bodies.
5.	Limitations for interstate E-Government and for Interdisciplinary projects.	2001	Survey conducted by municipalities	Used surveys to create report papers	Study focused on determinants of e-procurement adoption.	Focus more on working conceptual model which was developed.	Analyze the determinants which were shown here.
6.	The relations and interactions of E-government and E-Commerce	2010	Qualitative analysis has been conducted.	Already published papers have been used.	E-Government and E-Commerce are 2 different things and we have to keep this in mind then only we can advance.	Focus on key elements which differentiates between E-Government and E-Commerce.	Try not to mix e-government and e-commerce in future research.
7.	Preliminary Research on E-Government Development Overview	2013	Research Methodology is based on model which was proposed	Research based on previous literatures.	Tries to find significance of figuring out performance of e-government.	Implementation of e-government.	Differentiate between other countries and trying to establish key

			previously by author.				variables which makes government of one country different from others.
8.	E-government challenges in developing countries.	2018	PRISMA – Preferred Reporting Items for systematic Reviews and Meta analysis	Used IEEE and many other search portals for already published papers.	There are many challenges currently faced by developing countries, they can tackle the same by concentrating on each of them separately	Work more on the framework used in this research and solve the problems.	Understanding the framework used and using them to attempt solving the challenges.
9.	The future of E-Governments	2022	Quantitative research methodology	Literature survey about governments	The internet is vast and government should make it easy for public in accessing important information quickly	Educating the public about how vast world wide web is and how to precisely get the info they need from government	Try to research on how to be more accurate and keep the research paper short and more understandable
10.	E-Procurement Adoption at the municipal level	2011	Comprehensive research has been conducted	Has referred multiple case study	The study is focused on determinants of E-procurement adoption.	More research has to be done with different data sets	Testing the conceptual model using quantitative methods.
